SUMMARY

B.Tech student in Artificial Intelligence & Data Science at CMSCET. I build AI-powered apps, web platforms, and practical tools that turn technology into real-world impact.

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript, SQL, HTML5, CSS3
Frameworks & Libraries: Flutter, React, Firebase
AI / Data: Machine Learning, Data Analysis, Jupyter, OpenCV
Tools: Git & GitHub, VS Code, Figma

PROJECTS

MenuAashan - Modern Restaurant OS & Digital QR Menus

menuaashan.vercel.app

Zero-commission restaurant platform with instant QR table menus and real-time kitchen order sync.
Gemini AI scanner digitizes paper menus in seconds; live out-of-stock tracking and Razorpay payments.
Stack: React, Firebase, Gemini AI, Razorpay.

AI Menu Scanner

Extracts menu items from photos of printed menus using OCR and computer vision.

Student Portal

An academic and placement management platform built with Flutter and Firebase.

Weather Insights

Local weather analysis and visualization using Python.

EDUCATION

B.Tech in Artificial Intelligence & Data Science

CMSCET, Coimbatore | 3rd Semester | 2024 - Present

EXPERIENCE & INVOLVEMENT

Project Developer - MenuAashan

Personal project | 2025 - Present

Hackathon & Innovation

College-level hackathons | 2025

Technical Learner

AI, data science & app development | Ongoing

HIGHLIGHTS

- Built and deployed real-world projects (MenuAashan, web and mobile apps).
- Hands-on experience with AI and data science through college-level hackathons.
- Strong foundation in data structures, algorithms, and core computer science.
